Dumbwaiters Australia

lifestyle solutions

safety

quality

convenience

a seamless integration into your building and into your business

Background

A Parramatta Chinese Restaurant which can serve 500 people.

This restaurant has 2 levels, with the kitchen on the lower level, additional dining on the second level - 2 dumbwaiters service this area.

Approach

3 dumbwaiters were requested to be fitted - one is for meals to be transported from the lower level kitchen to the upstairs dining area, the second dumbwaiter is used for transporting goods and the third moves dirty items and rubbish back down to the kitchen.

Challenges

The stores lift, which is required to transport goods from the access ramp through a south facing entry, then goes up around 1 metre to be moved out the opposite north side.

Results

These dumbwaiters have become a vital tool for staff. They quietly and reliably perform a variety of transportation tasks. They have eliminated the hazardous task of transporting heavy goods to the kitchen and carrying meals upstairs to the dining area.
